

Video is mostly the same. Stop paying twice.

Carry state. Recompute only where validation requires it. Keep speedup denominators separate.

1 REPEATED VIDEO

stateless

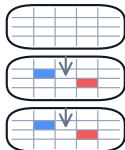

stateful

pay again

buy deltas

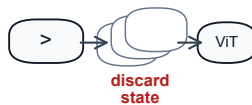

2 CHANGE CLUE

previous frame
motion + residual
changed blocks

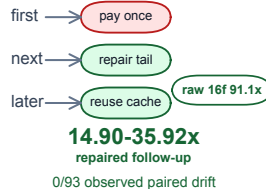

change is local

3 VLM LOOP

rebuild every query

4 C-PERSIST

5 C-VISION

1.316x
first-query E2E

Gemma 32f short; 0/20 paired drift
bounded sparse-vision cell

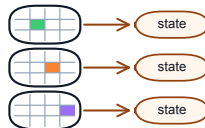

6 C-CEILING

do not multiply

stage share bounds every win

7 C-STREAM?

shift / rebuild / invalidate

candidate; not headline

8 TARGET SYSTEM

target: state > pixels
